

DATA CENTERS

Mission Critical Mechanical Services and Maintenance You Can Count On

Bahnson
Mechanical Systems
An EMCOR Company

Bahnson offers a full range of mechanical services and solutions tailored to the unique needs of data centers, regardless of size. Whether you're seeking a raised-floor solution, calibrated vector cooling, or more traditional computer room air conditioning units, we have expertise across a wide range of cutting-edge cooling systems to suit a variety of environments.

Precise Controls and Efficient Equipment, No Matter the Size

In order to keep mission-critical equipment operating at optimal efficiency, data centers require precise, stable, humidity-controlled conditions. With this in mind, Bahnson offers a full range of HVAC system and equipment installation, maintenance, and repair services. We also handle equipment upgrades and retrofits as well as center expansions.

Additional solutions include:

- > Precision cooling systems
- > Energy efficiency programs
- > Monitoring and controls
- > Preventive and predictive maintenance
- > Indoor environmental quality solutions
- > 24/7/365 emergency response

Qualified, Objective Recommendations

For repair and emergency services you can count on, our plans are designed to help keep your equipment and systems running properly while saving you money and reducing downtime.

With brand-neutral technicians qualified to work on all major manufacturers, our team provides services and objective recommendations designed to help keep your data center or similar environment operating smoothly and reliably.

MISSION CRITICAL ENVIRONMENTS WE SERVE:

Tiers I through IV

Server rooms

Network closets

Network operations centers

Telecom areas

Printer/copier/CAD centers
